Spanish

PROFILE

I'm a full-stack developer with a passion for building and maintaining complex mobile and web apps. I specialize in front-end and back-end tech, database design, and optimizing user experiences. I stay updated with the latest trends to deliver innovative, user-friendly solutions. My goals are exceptional results and continuous skill improvement.

WORK EXPERIENCE

React Native Developer

Archlife Industries Software   2022-Present

- Develop and maintain cross-platform mobile apps using React Native
- Work on both iOS and Android platforms to ensure consistent user experience
- Implement responsive UI/UX designs and layouts for various screen sizes
- Integrate third-party libraries and APIs, including authentication, push notifications, and geolocation services
- Implement and utilize Redux for state management
- Optimize app performance by identifying and resolving bottlenecks
- Employ cloud-based databases, such as PostgreSQL for real-time data storage
- Utilize debugging tools to diagnose and fix issues, including crashes, errors, and unexpected behavior in the app
- Use Jest for unit and integration testing to ensure codebase reliability
- Build and utilize reusable components

Sr. Staff Accountant

Lennar   2019-2023

- Monthly prepared Income and Balance Sheet statements
- Mentored and oversaw revenue accounting, deposit handling, and compliance
- Monitored backlog of over 500 sold homes (over $400 million)
- Managed accounts receivable and accounts payable
- Administered revenue-sharing agreements with land sellers, recognized costs, and disbursed payments according to the contracts

PROJECTS

Ask Away
iOS & Android Mobile App

A playful mobile app for asking and answering yes/no questions. Ask anything, monitor responses, and help others by answering their questions.

STEM Tech Network
iOS & Android Mobile App

A social network focused on fields of Sustainability, Teampower, Energy, and Medicine. Share STEM news, spread ideas, and learn from one another.
